I concur with Petra's email.

Because these are removals, Ronnie's is the most likely group to do and account for the removal assessments. If a state ask us for a removal, for example the Wilcox Oil, we work with Ronnie's group that assigns people from his staff.

Blake,

Ronnie's group most likely has a process for culling requests from States, etc.,. If our program requires a removal in some manner, my understanding is we funnel the action through his program and work with them in some capacity.

Also, one of the databases (i.e., Data Warehouse) most likely allows for some sort of query to occur for purposes of quantifying the number of removals conducted over a period of time. I'm also pretty sure his group has to account i.e., at the end of the year how many removals have been conducted.

Also applies to your programs.

In their opening comments at the DD meeting Mathy and Barry said that, as a consequence of GKM and a bunch of other Removals, the Administrator wants a report in early December that outlines what our protocols are to conduct

a Removal Assessment and undertake Emergency/time Critical/Non Time Critical Removal Actions. Are States officially or unofficially asking us to take action? What about citizens, NGO's, other entities? Do we have statistics?
